Join us in creating a world where all people with autism, across the spectrum and throughout the life span, can reach their full potential – and keep your support going all year long.

How does your support benefit the autism community?

Together, through the help of supporters like you, we continue to:

- *Increase global understanding and acceptance of people with autism*
- *Be a catalyst for life-enhancing research breakthroughs*
- *Increase early childhood screening and timely interventions*
- *Improve the transition to adulthood*
- *Ensure access to reliable information and services throughout the life span*

College or university - Autism Speaks U

Join a nationwide network of university students dedicated to raising awareness and funds in support of people with autism and their families. Initiated in 2006 at Penn State, the Autism Speaks U program has grown to over 30 chapters at colleges and universities across the U.S. supporting the Autism Speaks mission. Join with students, faculty and alumni in student-organized events and Walk teams. Have fun while making a difference!

About autism

Autism, or autism spectrum disorder (ASD), refers to a broad range of conditions characterized by challenges with social skills, repetitive behaviors, speech and nonverbal communication. We know that there is not one autism but many subtypes, most influenced by a combination of genetic and environmental factors. Because autism is a spectrum disorder, each person with autism has a distinct set of strengths and challenges. The ways in which people with autism learn, think and problem-solve can range from highly skilled to severely challenged. Some people with ASD may require significant support in their daily lives, while others may need less support and, in some cases, live entirely independently.

About Autism Speaks

Autism Speaks is dedicated to promoting solutions, across the spectrum and throughout the life span, for the needs of individuals with autism and their families. We do this through advocacy and support; increasing understanding and acceptance of people with autism; and advancing research into causes and better interventions for autism spectrum disorder and related conditions.
